Upstash Redis REST
Worker handler mode
Brevo HTTPS API
BEGIN and business + audit + inbox + email delivery
COMMIT
Authenticated invocations, independent activation flags
Claim committed publish leases, limit 5
Publish delivery IDs only
Mark published or release lease
Peek bounded IDs
Claim send lease and load stored payload
Send transactional email
alt
[Provider accepted]
Acceptance identifier
Record sent outcome
Acknowledge pointer
[Throttled or ambiguous]
Retryable response or unknown outcome
Record bounded retry or uncertain state
Uncertain outcomes require reconciliation, not blind resend
